

## Job Advertisement No. 24/2018

The **Leibniz Institute for Natural Product Research and Infection Biology – Hans Knöll Institute –** (HKI, [www.leibniz-hki.de](http://www.leibniz-hki.de)) investigates the pathobiology of human-pathogenic fungi and identifies targets for the development of novel natural product-based antibiotics. The Department of **Infection Biology** invites applications for

# Post Doctoral Researcher (m/f)

Successful candidates will investigate the field Complement Evasion of pathogenic microbes including in particular *Candida albicans* and *Aspergillus fumigatus*. Main topics of the project are

- Characterisation of fungal immune evasion proteins
- How do microbial immune evasion proteins influence innate and cellular immune response?
- Functional characterization of FHR5 recruitment by pathogenic microbes

For further details please see literature below:

**Requirement:** PhD degree in biology, genetics or life sciences. Experience, knowledge and good experimental skills in cell and molecular biology, genetics and biochemistry are of advantage.

### For further information

Prof. Dr. Peter Zipfel | +49 3641 532 1300 | [career@leibniz-hki.de](mailto:career@leibniz-hki.de)

### Applications

Salary is paid according to German TV-L (salary agreement for public service employees). As an equal opportunity employer the HKI is committed to increase the percentage of female scientists and therefore especially encourages them to apply.

Complete applications in English should include a letter of interest, curriculum vitae, a complete list of publications, brief statement of research experiences, a list of three potential references, full academic record (copies of degree certificates), and should be submitted by via the [online application](#) system until **15.12.2018**.
