

The **Leibniz Institute for Natural Product Research and Infection Biology** (Leibniz-HKI, www.leibniz-hki.de) investigates the pathobiology of human-pathogenic fungi and identifies targets for the development of novel natural product-based antibiotics. The department **Microbiome Dynamics** invites talented and highly gifted candidates to apply as

Postdoctoral Researcher (f/div/m) in Metagenomics

for three years initially.

The department **Microbiome Dynamics (MBD)** is seeking an excellent and enthusiastic postdoc scientist for high risk-high reward research in the fields of metagenomics and big data integration. MBD is an active participant in several national and international collaborative efforts to study the interplay between the host, symbiotic communities, and pathogenic species. Together with renowned scientists and supported by an excellent infrastructure you will have the opportunity to make an important contribution toward a healthier society. The objective of the postdoc project is to develop AI models using clinical, biochemical, and microbiome data for discovering novel disease biomarkers and designing therapeutic strategies in chronic non-communicable diseases. We strive for academic excellence in an environment characterized by collegial respect and academic freedom tempered by responsibility.

Your profile:

- Doctoral degree in systems biology, computational biology, bioinformatics, biophysics, computer science, or a related discipline
- A strong interest in conducting collaborative research on the topic outlined above is paramount
- Candidates are expected to be interested in working at the boundaries of several research domains
- Expert in the analysis of biological high-throughput data
- Knowledge of statistical methods in the context of biological systems
- Proficiency with programming (Python, Perl, C++, R)
- Well-developed collaborative skills

We offer:

- The successful candidate will be hosted in the department **Microbiome Dynamics** of **Prof. Dr. Gianni Panagiotou** of the Leibniz-HKI in an international, dynamic team and an “open-door” atmosphere with access to state-of-the-art computational resources.

Leibniz-HKI-16/2023

Leibniz Institute
for Natural Product Research
and Infection Biology
Hans Knöll Institute

- **MBD** is currently coordinating the BMBF-funded consortium PERMICCION, and is an active participant of the Cluster of Excellence “Balance of the Microverse” (www.microverse-cluster.de) and the CRC/Transregio 124 “Pathogenic Fungi and Their Human Host: Networks of Interaction” (www.funginet.de) funded by the Deutsche Forschungsgemeinschaft.
- We offer an international and multi-disciplinary environment with strong expertise in the proposed research field. Currently, the group consists of approximately 15 members at different levels of seniority.
- Salary is paid according to German TV-L (salary agreement for public service employees).

Prof. Dr. Gianni Panagiotou | +49 3641 532-1759 | career@leibniz-hki.de

Applications:

Leibniz-HKI is proud to be an equal opportunity employer and promote diversity and inclusion in the workplace. It aims to increase the proportion of underrepresented groups in case of equal suitability. All qualified persons, regardless of race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability, veteran status, or other classification protected by law will receive consideration for employment.

Complete applications in English should include a cover letter, a CV containing a complete list of publications, a brief statement of research experiences, a certificate of study / transcript of records, the addresses of two possible referees and should be submitted via the Leibniz-HKI **online application system**. The deadline for the advertisement is **April 16, 2023**, but applications will be reviewed on a rolling basis.
